

## Dräger X-am<sup>®</sup> 2500 Multi-Gas Monitor

The Dräger X-am 2500® was especially developed for use as personal protection. The 1 to 4 gas detector reliably detects combustible gases and vapours, as well as O<sub>2</sub>, CO, NO<sub>2</sub>, SO<sub>2</sub> and H<sub>2</sub>S. Reliable and fully mature measuring technology, durable sensors and easy handling guarantee a high degree of safety with extremely low operating costs.

# DURABLE ELECTROCHEMICAL SENSORS

Fully developed, high performance Dräger sensors in an extra small format for CO, H<sub>2</sub>S, O<sub>2</sub>, SO<sub>2</sub> and NO<sub>2</sub> gases enable safe use in industry, mining and in refineries. The impressive hydrogen sulphide sensor has a high resolution, so it can reliably measure even very low workplace limits. The non-consumptive and lead-free sensor for oxygen is characterized by an especially long service life of more than 5 years. Our CO and H<sub>2</sub>S sensors also have this long service life expectation, so they contribute to especially low operating costs.

## POISON RESISTANT EX SENSOR

The innovative, catalytic Ex sensor is impressive due to its high resistance to silicone and hydrogen sulphide. Together with the high degree of drift stability, this resistance enables an extraordinarily long service life of more than 4 years. Its high sensitivity with regard to flammable gases and vapours is confirmed by technical approval for measuring according to IEC/EN 60079-29-1 from methane to nonane. This approval also demonstrates the suitability of this instrument for use in refineries and in the chemical industry as well.

#### **MAXIMUM SAFETY**

The Dräger X-am 2500 has Ex approval for zone 0, so it is clearly designed for very high user safety in areas subject to explosion hazard. The functional design ensures that gas can enter from above and from the side – even if the instrument is inside a pocket or if the front gas entry is accidentally covered.

# MAINTENANCE: FAST, EASY, INEXPENSIVE

From functional test to complete documentation, users have access to practical solutions that provide safety for implementation at any time. The Dräger Bump Test Station, which does not require a local power source, and the automatic Dräger X-dock testing and calibration station for comprehensive equipment management are ideal system additions that save time and effort. Together with the Dräger X-dock, the high quality Dräger sensors enable quick bump tests of 8 to 15 seconds<sup>1)</sup> with very low gas consumption. This significantly reduces your equipment operating

**Dräger X-am® 2500**Robust 1 to 4 gas detector for personal protection.

#### DRÄGER X-AM® 2500

## **DIFFUSION OR PUMP**

For clearance measurements for tanks and shafts or when searching for leaks, an optional external pump with a hose up to 30 m long is the optimum solution. When the measuring instrument is inserted, the pump function starts automatically. The switch from diffusion to pump operation can be handled quickly and easily without tools or screws.

## **ERGONOMIC AND ROBUST**

Thanks to its low weight and ergonomic design, the Dräger X-am 2500 offers a high degree of wearing comfort. The practical two button control panel and easy menu navigation allow the instrument to be used intuitively, despite its comprehensive functionality. The integrated protective rubber coating and sensors that are not sensitive to shock provide additional safety in case of impacts or vibrations. Moreover, the Dräger X-am 2500 is not sensitive to electromagnetic radiation, e.g. from wireless devices. The Dräger X-am 2500 is water and dust resistant in accordance with protection class IP 67, so full functionality is guaranteed even if it falls into the water.

## **RELIABLE POWER SUPPLY**

The Dräger X-am 2500 can operate with either alkaline batteries or with rechargeable NiMH batteries. This enables a reliable power supply for more than 12 hours, and with the high capacity battery pack more than 13 hours. Depending on the requirements, the batteries can be charged either in the workshop or in a vehicle. Operating time without Ex sensor is typically more than 250 hours.

Dräger X-am® 2500

Efficient maintenance and comprehensive equipment management with the optional Dräger X-dock testing and calibration station.

Dräger X-am® 2500 Flexible with external pump for clearance measurements

Dräger X-am® 2500 Reliable personal protection, e.g. in confined space

	Pressure	700 to 1300 mbar			
	Relative humidity	10 to 95 % r.h.			
Protection class		IP 67			
Alarms	Visual	360 °			
	Audible	Multi-tone > 90dB at 30cm			
	Vibration				
Operating times		> 12 h with alkaline and NiMH,			
		> 13 h with NiMH HC, > 250 h w/o Ex sensor with alkaline batteries			
Charging time		< 4 h			
Datalogger		Retrievable using an infrared interface > 1000 h with 4 gases at a recording interval of 1 value per minute			
Approvals	ATEX	I M1 Ex ia I Ma, II 1G Ex ia IIC T3 Ga, I M2 Ex d ia I Mb, II 2G Ex d ia IIC T4/T3 Gb			
		Performance approval to:			
		EN 50104 (2002)+A1(2004)	$O_2$		
		EN 45544	CO & H <sub>2</sub> S		
		EN 60079-29-1:2007	Methane to nonane
